ABH LOGO

LAST UPDATED 18 September 2026 CREATIVE Jason Durgin

ABH LOGO ANATOMY, MINIMUM SIZE AND USAGE

Minimum size

The logo should appear no smaller than 32px high. If there is a need for a favicon, consult Airwallex and we will supply one.

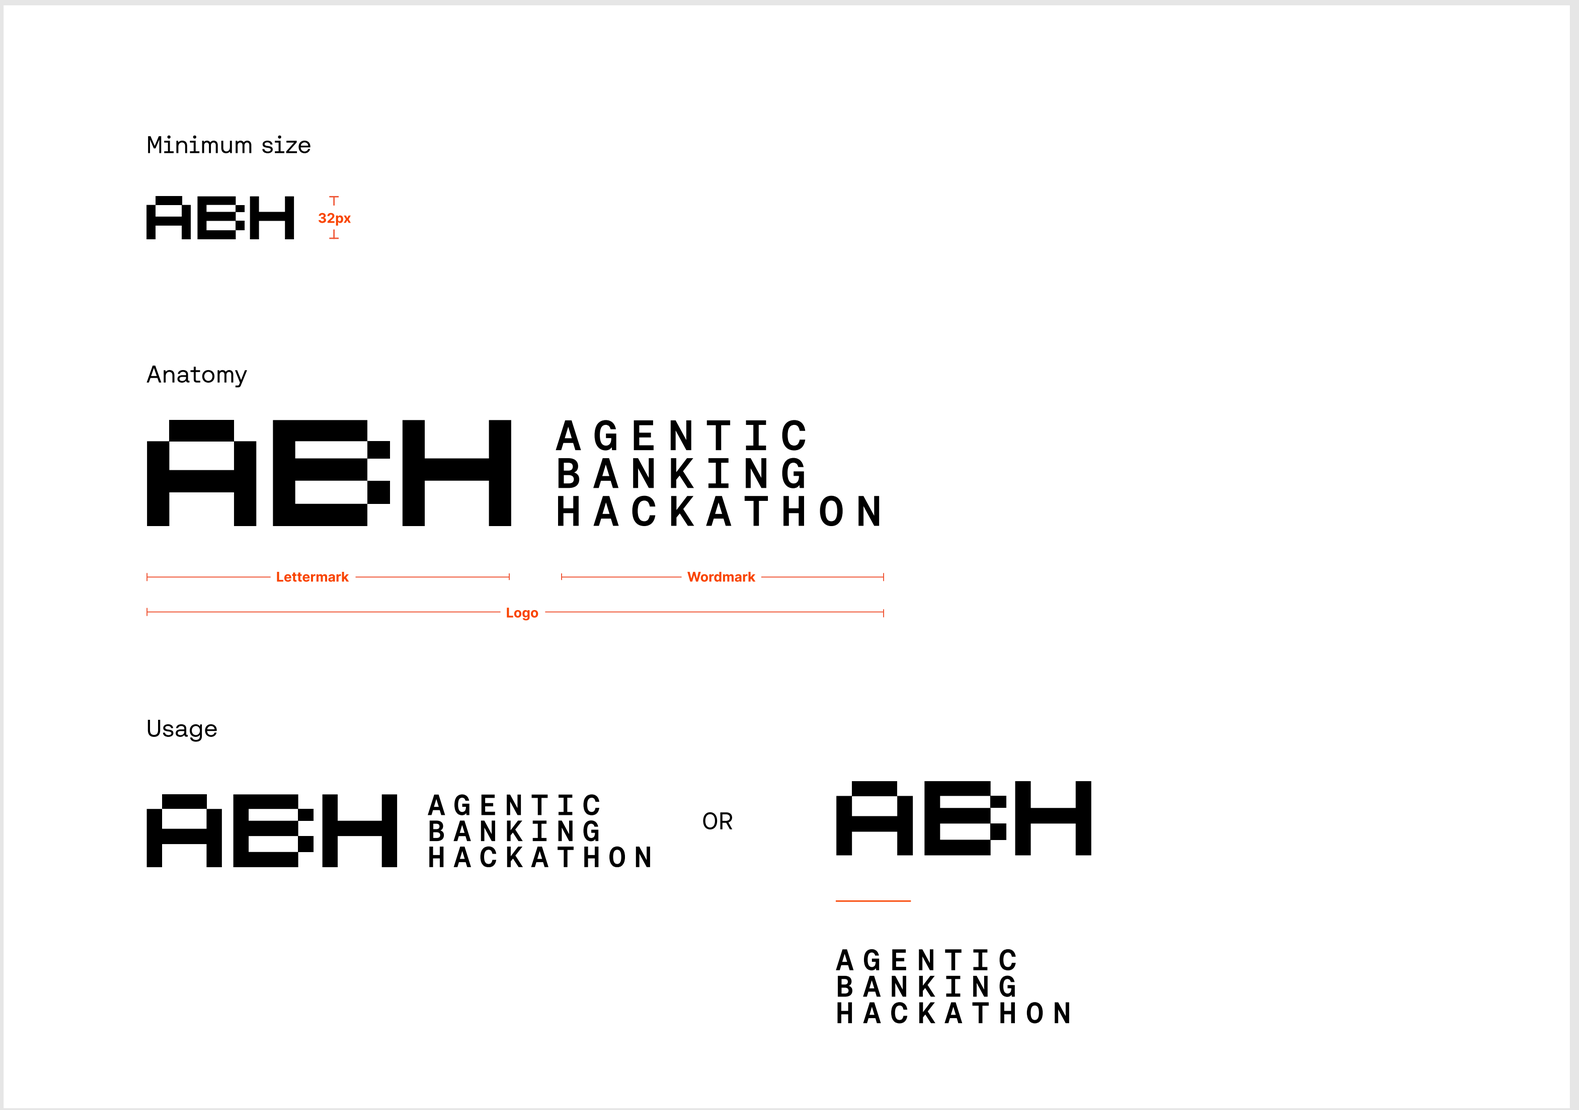

Anatomy

The logo is comprised of a lettermark, wordmark, and both of them together are called the logo.

Usage

You can use the logo in it's entirely (locked up) or the lettermark and wordmark independently on the same composition. When using independently, never use either by themselves. Always use on the same canvas and in close proximity.

Always use wordmark at 100% the height of lettermark.

Fono Regular
Fono Medium
Fono Bold

Aeonik Fono delivers the charm of a monospaced aesthetic without the limitations of a true mono font. Designed for typographers seeking that “mono vibe,” it blends the best of classical Aeonik and Aeonik Mono into a proportional type family that’s a pleasure to use in text and headlines alike.

With proportional spacing and kerning, Aeonik Fono is easier to read than traditional monospaced fonts while maintaining the mono-inspired feel. It is available in eight weights, from Thin to Black, and supports an extensive range of languages, including most European languages written in the Latin script, as well as Vietnamese, multiple Cyrillic-based languages, and Greek. Language support options can be selected at checkout.
