

Logo construction

How the HackerEarth logo is built: the grid, the proportions and the spacing rules that keep it consistent at every size. All measurements come from the master SVG.

Anatomy

The logo is a single lockup. The monogram's knocked-out h is also the first letter of the name, so the full lockup reads *hackerearth*.

1

Container

A 30u square with 8u continuous (smoothed) corners.

2

The h

Knocked out of the container. Its stem runs off the top edge.

3

Cursor

An underscore under the h, like a terminal prompt (h_). It's the code reference in the mark.

4

Wordmark

"ackerearth", lowercase. The monogram supplies the opening h.

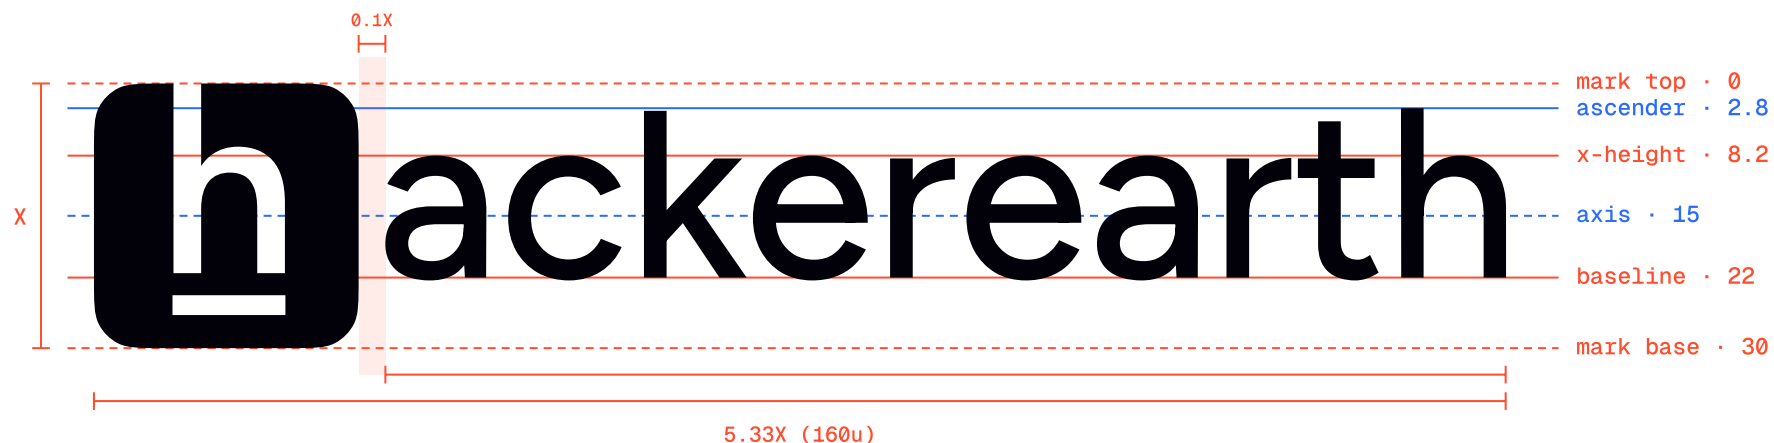

5

Joint

A fixed 3u gap between the mark and the wordmark.
Never change it.

Lockup proportions

The wordmark's x-height band is vertically centred on the monogram, so the lowercase letters sit level with the knocked-out h.

All values in u (1u = X/30). The wordmark's x-height band (8.2–22u) centres on the mark's axis at 15u. Ascenders (h, k) reach 2.8u, below the mark's top edge.

GAP

0.1X

3u from the container edge to the bowl of the "a".

RATIO

5.33 : 1

Full lockup width : height. Master artboard is 161 × 30.

WEIGHT

1.22×

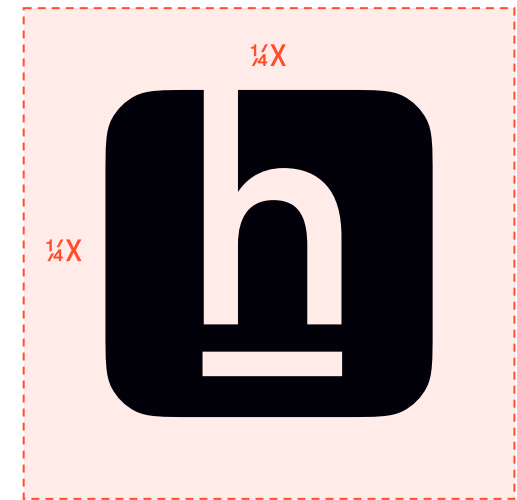

The monogram stem (3.14u) is heavier than the wordmark stem (2.57u), so the knockout holds at small sizes.

Clear space

Leave at least $\frac{1}{2}X$ (half the monogram height) on every side. Keep text, edges and other graphics out of this zone.

The faded corner tiles are the monogram at half size. Use one to measure the clear space.

Monogram on its own (avatars, favicons, app icons): $\frac{1}{4}X$ minimum on every side.

Minimum size

Below these sizes the cursor and the h counter fill in. Use the monogram on its own when space is tighter.

Lockup · digital

96 px wide (X = 18 px)

Lockup · print

25 mm wide (X $\approx$ 4.7 mm)

Monogram · digital

16 px

Monogram · print

6 mm

Examples are drawn at the minimum digital sizes. Print sizes are shown approximately.

Colour

The logo uses one colour: Ink or White. The h and cursor are cut out of the container, so they always show the background.

Ink

HEX #020109

RGB 2 · 1 · 9

Primary on light

White

HEX #FFFFFF

Approved variants

Use the horizontal lockup wherever possible. Use the monogram on its own only when the brand name is already visible nearby or space is square.

Misuse

Don't redraw, rearrange or decorate the logo. Always start from the master files.

✗ Don't stretch or squash it

✗ Don't rotate or tilt it

✗ Don't recolour it or use more than one colour

✗ Don't change the 0.1X gap

✗ Don't rearrange the mark and wordmark

✗ Don't outline it or add strokes

✗ Don't add shadows, glows or effects

✗ Don't fill in the h or the cursor

✗ Don't place it on busy or low-contrast backgrounds
